

CONTENTS

1 FORECASTING AND MANAGEMENT: AN INTRODUCTION	1
The Limits of Predictability	2
Making Forecasts (and Forecasters) Look Good	4
Identifying Patterns	6
Discovering Relationships	8
A Taxonomy of Forecasting Methods	10
Overview	11
2 FACING THE FUTURE: THE ROLE OF FORECASTING	20
The Role of Forecasting in Planning and Decision Making	20
Current Forecasting Approaches and Their Fit with Planning and Decision-Making Requirements	26
Assessing Management's Forecasting Options: Matching the Situation with the Method	31
Selected References for Further Study	36
3 INTRODUCTION TO QUANTITATIVE FORECASTING METHODS	37
Types of Models	38
Measuring the Accuracy of Quantitative Forecasting Methods	43
Naive Methods: A Benchmark for Forecasting Performance	47
Effort and Resource Requirements for Forecasting	51
	xiii
xiv Contents	
4 SIMPLE TIME-SERIES SMOOTHING METHODS	54
Introduction	54
Simple Moving Averages	56
Exponential Smoothing	61
Linear Exponential Smoothing	66
Winters' Linear and Seasonal Exponential Smoothing	69
Other Forms of Smoothing	75
Using Single or Linear Exponential Smoothing after Deseasonalizing a Data Series	75
Selected References for Further Study	80
Appendix: Initial Values for Exponential Smoothing Approaches	80
5 DECOMPOSITION METHODS FOR TIME-SERIES FORECASTING	83
Major Steps in Decomposition	85
Preparing a Forecast Based on the Decomposition Method for Time-Series Analysis	95
Additional Aspects of Decomposition Methods	103
Selected References for Further Study	108
6 ADVANCED TIME-SERIES METHODS	110
Autocorrelation	111
Alternative Classes (Types) of Time-Series Models	115
The Box-Jenkins Approach	117
An Application of the Box-Jenkins Methodology	124
Parzen's ARARMA Models	131
AEP Filtering	135
Kalman Filters	136
Lewandowski's FORSYS	138
Multivariate Time-Series Methods	139
Selected References for Further Study	141
7 SIMPLE REGRESSION METHODS	143
Determining the Parameters of a Straight Line	147
The Precision and Significance of a Regression Equation	152
Simple Correlation	157
	Contents xv
The Regression Equation as a Model	162
Selected References for Further Study	164
8 MULTIPLE REGRESSION	165
The Application of Multiple Regression Analysis	167
Multiple Correlation and the Coefficient of Determination	169
Tests of Significance	170
Assumptions Inherent in Multiple Regression Analysis	173
Using Multiple Regression Analysis in Practice	177
Summary	190
Selected References for Further Study	191
9 ECONOMETRIC MODELING AND BUSINESS CYCLE FORECASTING	192
Econometric Models	192
An Application of an Econometric Model	196
Advantages and Drawbacks of Econometric Models	198
Leading Indicators	200
Planning Management Actions Based on Business Cycle Forecasts	209
Selected References for Further Study	212
10 MONITORING APPROACHES	214
Automatic Monitoring of Forecasting Errors: Tracking Signals	215
Computing the Smoothed-Error Tracking Signals	220
Judgmental Monitoring of the Trend Cycle	231
Selected References for Further Study	234
11 SUPPORT TOOLS FOR QUANTITATIVE FORECASTING—DATA DEVELOPMENT AND COMPUTERS	235
Definition and Specification of Variables in Forecasting	236
Data Collection and Data Sources	239
Problems of Accuracy in Data	241
Databases, Updating, and Auditing	244
Computers and Forecasting	245
	Contents xvii
Computer Systems That Integrate Quantitative Forecasting Methods and Management Decision Making	252
Summary	253
Selected References for Further Study	262
12 SELECTING APPROPRIATE QUANTITATIVE METHODS	263
Forecasting Accuracy: Explanatory Versus Time-Series Methods	263
The Forecasting Accuracy of Explanatory Methods	264
The Forecasting Accuracy of Time-Series Models	265
Conclusions	277
Selected References for Further Study	278
13 QUALITATIVE AND TECHNOLOGICAL APPROACHES TO FORECASTING	279
Growth Curves	281
Time-Independent Technological Comparisons	285
The Morphological Research Method	286
The Delphi Method	289
PATTERN: A Relevance Tree Method	291
Cross-Impact Matrices	293
Futuristics and La Prospective	295
Summary	300
Suggested References for Additional Study	300
14 EVALUATING TECHNOLOGICAL FORECASTING APPROACHES	302
The Extent of Technological Forecasting in Practice	302
The Usefulness of Technological Forecasting	304
Evaluating the Success and Failure of Technological Forecasting	307
Summary	309
Selected References for Further Study	310
15 JUDGMENTAL APPROACHES TO FORECASTING	311
The Jury of Executive Opinion	311
Sales Force Composite Methods	312
	Contents xvii
Anticipatory Surveys and Market Research-Based Assessments	314
Subjective Probability Assessments	317
Major Problems with Judgmental Methods	319
Selected References for Further Study	330
16 BIASES AND LIMITATIONS IN JUDGMENTAL METHODS	331
An Overview of Judgmental Biases and Limitations	332
Judgmental Biases Particularly Relevant to Forecasting	337
Human Judgment Versus Models of Human Judgment	345
Summary	346
Selected References for Further Study	347
17 THE PRACTICE OF FORECASTING	349
Familiarity and Satisfaction with Major Forecasting Methods	350
The Use of Different Forecasting Methods	352
Perceptions of Forecasting Accuracy	355
Contrasting Users and Preparers of Forecasting	357
Developmental Stages in an Organization's Use of Forecasting	363
Summary	365
Selected References for Further Study	365
18 ACHIEVING FORECASTING'S FULL POTENTIAL	367
Guiding the Forecasting Function	368
Improving Existing Applications of Forecasting	370
Developing New Forecasting Applications	379
Summary	386
Selected References for Further Study	388
INDEX	389
